Insights / Needs Chart

Website:

Enviro-Collective: Regina's Community Climate Hub - by the Climate Reality Project.

Client:

Rob Deglau

Insights:

1) BOOKING:
    a) Insight:
        i) Booking needs to be straight forward all in one spot.
        ii) Needs to be able to book multiple appointments in one go, instead of having to go back to the website to book another appointment.
        iii) Search option for people/times/items
    b) What we need to do for website:
        i) Users can look up who/what/when they want to visit the Repair Shop, Users can book multiple slots at one time, and the website does not take you to a different website.
2) Newsletters "The Pollinator"
    a) Insight:
        i) Hard to find specific newsletter, User scrolls until they find the one they want.
        ii) Archives are just kept under new newsletters each week.
        iii) Bad layout.
        iv) Wants to highlight authors/volunteers who make it possible to send out a newsletter and write the newsletter.
    b) What we need to do for website:
        i) Search bar where users can search words or dates to find the newsletter they are looking for.
        ii) Better layout for older/archived newsletters, and highlighting the most recent newsletter.
        iii) Make the newsletter more visually appealing.
        iv) Notify members/subscribers when there is a new letter.
        v) Highlight the authors and volunteers of The Pollinator, before the written newsletter.
3) Graphics & Interactivity / Overall design of website
    a) Insight:

i) Boring layout, client wants more graphics to make the website attract new users.

b) What we need to do for website:

i) Add graphics / images / colours

ii) Create and stick to colour theme

4) Fundraising and Donations

a) Insight:

i) Client wants better way to promote fundraisers and donations to help the company raise some money for gadgets.

b) What we need to do for the website:

i) Create a page/area where the user can donate that does not take the user to a different website.

ii) Create a page/area where there is information about any upcoming fundraiser.

Needs Chart:

NEEDS:	**What**	**Why**	**What we can do**
Better Booking system	Keep users on same website to book	Taking users to different websites can cause users to not use booking site anymore.	Build a booking site right within the Enviro-Collective website.
Book more than one appointment	Users can book multiple appointments at once easily	Users get frustrated and might not come back to website	Create a system inside of the website, where users can book multiple appointments easily and quickly.
Newsletters layout	More visually appealing newsletter with better layout	Easier to read for users, not boring to look at, might keep users coming back to website	Create sections for newsletters, bigger headings, more colours, organize by year/month.
Search feature	Search feature in The Pollinator Newsletter to look up specific word/date	Make it easier for the user to find archived newsletters to read	Create a [Control] + [F] type feature in the newsletter section of the website.
Highlighting Volunteers	Give volunteers recognition in the website / Pollinator.	Shows Enviro-Collective cares about volunteers, making them want to come back to the website.	Create a volunteer page/section to highlight the most recent people, or anyone that has ever volunteered there.
More graphics	Client wants site more visually appealing	To attract younger users, and keep people coming back to the website.	Add images, videos, graphics, create a colour scheme.
Easy donation spot	An area where the user can donate to the company.	Shows users that they can help by donations, makes easy for anyone to donate.	Create donate link, easy to use, big button for it.
