Activity 2

October 23, 2026

ENSE 271

Updated insights + Needs Chart

Website:

Enviro-Collective: Regina's Community Climate Hub - by the Climate Reality Project.

Client:

Rob Deglau

Insights:

1) Home Page
    a. Insight:
        i. The home page is so important, instead of words, we need links to repair café, pollinator, and The Smash Lab.
    b. What we need to do:
        i. Create clickable links right away to show the different things EnviroCollective does!
        ii. Home page: Images, clickable links to other pages (Smash lab, Pollinator Newsletter, Repair Café), Then words and images below explaining more of what they do.
        iii. Keep the home page aesthetic, and the other pages more informative!
2) Graphics + Pictures
    a. Insight:
        i. Scroll wheel cool, but need to indicate to users that you can scroll through pictures.
    b. What we need to do:
        i. Either put up arrows to show you can scroll, Or do automatic scrolling on the images while the user is on the page.
3) Color and design
    a. Insight:
        i. Client wants the colors to match the logos and graphics they already have. Not necessarily green! And no yucky lime/yellow green
    b. What we need to do:

i. Choose color palette that goes well together using that color palette website.
ii. Find main color for the home page. Repair café colors: navy blue and red like the logo! Pollinator colors: Green and neutral colors.

4) Pollinator:
    a. Insight:
        i. Need to have searching database to find any past newsletter
        ii. Wants to call it "The pollinator: E-Newsletter"
    b. What we need to do:
        i. Obtain all of the archived newsletters, put them into one page, and have a find button to go looking for the website.
        ii. Keep the most recent two newsletters on the first page, and a button to read the whole thing with pictures.
        iii. Rename menu, and main page title to "The Pollinator: E-Newsletter"
        iv. Keep color coordination with the main Pollinator logo. Pull from these colors using that website.

Needs/Wants chart!

NEEDS:	**WHAT:**	**WHY:**	**What we can do:**
Color scheme	More visually appealing – matches logo vibe.	Fun to look at, more graphics, keeps people coming back	Find a palette, stick to it. Maybe make different pages different palette!
Photos + Graphics	Easier user understanding of how pictures work.	Easier user ability. Interact more with the website.	Create arrows on page to switch between pictures OR Automatic scrolling added to pictures.
Pollinator E Newsletter	Color scheme same as Logo. Searchable database.	Easy to find archived newsletters.	Add a search bar.

Updates since Activity 1 – Main Meeting takeaways:

- Home page importance.
- Color theme updates: find new colors that match well to logos.

    - Does not have to be green and brown. (does not like green and brown)
    - Repair café and smash lab have their own colors!
- Scrollable images.
- Boxes behind text boxes to make the words easier to read.
